Are you interested in sustainability and environmental issues?
Are you concerned about climate change?
Do you want to know more about natural resources and alternative energy sources?
Are you interested in how scientists predict the weather?
Would you like to make this your career?

here’s how we can help

find your major

https://earth.indiana.edu
The BACHELOR OF SCIENCE IN EARTH SCIENCE provides training for those who want to become professional geologists and seek careers in the application of earth sciences to the minerals, energy, and environmental industries as well as federal and state agencies, research laboratories, and postsecondary education.

**degree requirements**

1. EAS E226 Earth Processes, EAS E225 Earth Materials and EAS E227 Earth History and Climate (10 credits total)
2. EAS E314 Data Analysis and 9 more credits at the 300-level (12 credits total)
3. EAS X429 Field Geology in the Rocky Mountains (6 credits)
4. 12 more credits at the 400-level
5. Allied sciences - chemistry, biology, math, physics (30 credits)

The BACHELOR OF ARTS IN EARTH AND ATMOSPHERIC SCIENCES provides a broadly based background in the fundamentals of Earth and atmospheric sciences. It offers maximum flexibility in course selection to enhance interdisciplinary study and makes a double major easily accessible to students in related fields.

**degree requirements**

1. One course at the 100 level, with a maximum of three courses
2. One course at the 200 level, with a maximum of two courses
3. At least one course at the 300 and 400 level
4. Course work at the 200, 300, or 400 level to reach a minimum of 25 credit hours in Earth and Atmospheric Sciences
5. 6 (or more) additional credits in allied sciences that carry N&M credit

The BACHELOR OF SCIENCE IN ATMOSPHERIC SCIENCE degree is designed to provide the education and training students need to begin a promising career in meteorology, atmospheric science, or environmental science, working for government weather agencies or private industry. We offer the BS degree and a Certificate in Atmospheric Sciences.

**degree requirements**

1. At least 30 total credits in Earth and Atmospheric Sciences
2. Physical Meteorology & Climate (EAS A340), plus at least 15 additional credits at the 300-level
3. 6 credits in non-atmospheric science courses in the department, at the 200-level
4. Allied sciences - chemistry, mathematics, physics, and others (29 credits)
