GRADUATE COMMITTEE

Role of the Graduate Committee
The Graduate Committee is responsible for administration of admissions, academics, and other advisory issues for graduate students in the department. The committee acts on applications for associate instructorships, fellowships, and summer research support and monitors academic progress of students. The committee consists of faculty members chosen to represent a range of disciplines and research fields in the department. The committee is assisted in its work by Toni Arcuri, Graduate Services Coordinator.

Current members of the committee are:

Dr. Gary Pavlis- Director of Graduate Studies; Dr. Kaj Johnson, Director of Graduate Admissions

Director of Graduate Studies email: pavlis@indiana.edu

Director of Graduate Admissions email: kajjohns@indiana.edu

Graduate Services Coordinator email: geolgrad@indiana.edu
Degrees Offered
The following graduate degrees are offered in the Department of Geological Sciences: MS Geology, MS Geology-Atmospheric Sciences, Ph.D Geology, Ph.D Geology-Atmospheric Sciences.

Residency
All graduate students must complete at least 30 hours of graduate credits in residence at the IU Bloomington campus. Ph.D students must be in residence at the Bloomington campus for at least two consecutive semesters during the degree program.

IUB College Information
Visit the College’s website, including the Graduate School, frequently. (http://www.indiana.edu/~grdschl/index.shtml). Use the links on the College Graduate Office page to submit requests (Extensions of Incomplete, Family and Medical Leave), to apply for funding (College Travel Awards, College of Arts and Sciences Dissertation Year Research Fellowships), and to appoint your Doctoral Advisory Committee.

Selection of Advisors and Research Committee
The Graduate Committee will advise each new graduate student on course selection until a primary advisor is selected. Students should choose a primary advisor from the graduate faculty within the Department of Geological Sciences or the Indiana Geological Survey www.igs.indiana.edu. If the primary advisor is from the Indiana Geological Survey, a co-advisor from the Department is required (Appendix 1).

A Research Committee will oversee the student’s academic and research progress toward the degree. For all degrees, the majority of members of the research committee must be selected from within the Department of Geological Sciences. The field of expertise of both the primary advisor and the research committee should reflect the topic of research chosen by the student.

Communication with Research Committee
Students must keep members of their Research Committee informed of progress with research and fulfillment of academic requirements on a regular basis, through both meetings and e-mail. Meetings should occur at least once each semester of the academic year (Spring and Fall), although students are strongly encouraged to meet more frequently with their committee members on an informal basis.

Annual Review
An Annual Review of academic and research progress is required of all graduate students in the department. All students are to submit the completed Annual Review forms by April 15. Submission procedures will be announced. The Graduate Committee may require a student to submit forms earlier than the April 15 deadline as the need arises. Appendices 2 and 3 contain sample copies of M.S. and Ph.D. Annual Reviews. These are available on the departmental website as interactive PDF forms under the Education tab and by the following link to the Graduate Handbook Appendices: http://geology.indiana.edu/education/grad_handbook.html

To activate the fillable forms, click on "open in another program" and choose "open in Adobe PDF."

Completion of the Annual Review forms requires a meeting of the student with the research committee and signatures from committee members and student. Students must scan all pages of the review, including the signed forms, and submit as one PDF to the Graduate Service Coordinator. Students who fail to complete their annual review are subject to loss of departmental support following a review by the Graduate Studies Committee and the Chair.

Sources of Funding
The Department of Geological Sciences awards AI, RA and Fellowship support, as well as summer research funds, on a competitive basis. AI support includes preparing for and teaching laboratory courses, among other duties. RA support is dependent on specific research funds procured by individual faculty members through externally-funded grant proposals. Fellowships and summer research support are available from assets allocated to general or specific departmental accounts.

Diplomas
Degrees are granted every month of the year. The University Graduate School requires receipt or an electronic copy of the thesis/dissertation prior to the 15th day of the month for which the degree is to be granted; if received after the 15th the degree will be granted the next month. A degree diploma is mailed to a student’s home address two to three months after the degree is conferred. Diplomas are sent third-class mail through the US Postal Service. Please be aware that third-class items are not forwarded to a new address. In this regard, students must verify that the correct permanent home address is on file with the Registrar in order to have the degree mailed to the desired location. Please see Ms. Arcuri if you are an international student desiring special arrangements for receipt of the diploma. Ms. Arcuri can instruct you to have the diploma sent from the University Graduate School to the Geology Graduate Office (GY-127). Our department will then send the diploma by airmail to your international address. Duplicate diplomas may be obtained through the Registrar for an additional fee.
MASTER OF SCIENCE THESIS OVERVIEW

This degree option is recommended for most students entering the program with an undergraduate degree. The degree requirements include:

Total of 30 credit hours

- At least 22 of the 30 hours must be graduate-level courses. 400-level courses from the Department of Geological Sciences that can be taken for graduate credit are listed in Appendix 6. 500-700-level Geology courses and lower-level courses from other departments that count toward graduate credit can be found in the University Graduate School Academic Bulletin (see the section entitled Graduate Credit-General in the Academic Regulations section of the University Graduate School Academic Bulletin).
- 12 of the 22 hours must be from the Department of Geological Sciences.
- A minimum of 3 credits of G810 (research credits) are required; a maximum of 8 credits of G810 can be applied toward the degree.
- At least three 3-credit hour courses of 500 level or above must be taken from the Department of Geological Sciences.
- Selection of courses must be approved by the primary advisor in consultation with the student’s research committee.

Transfer of credit — up to 8 credit hours of graduate classes can be transferred from another institution, provided the classes meet the requirements of equivalency of graduate classes offered at IU and a grade of ‘B’ or higher was achieved. Pass/Fail or ‘S’ graded classes cannot be transferred. Requests for transfer of credit hours originate with the student and advisor, then Graduate Committee. Students will be required to highlight on a copy of their transcripts the specific courses they request for transfer and bring the transcript to the Graduate Office GY 127. Transfers have to be approved by the University Graduate School and courses must have been completed within 5 calendar years prior to awarding of the Masters degree.

Minimum Grade Point Average — All Masters students must maintain a 3.0 (B) grade point average. Students with a GPA less than 3.0 can be placed on academic probation until the student’s GPA increases to above 3.0. While on academic probation, the student cannot be supported as an AI, RA, or Fellow. If the GPA does not reach 3.0 in two semesters of probation, this will lead to dismissal from the graduate program.

Primary Advisor — an advisor (and co-advisor if necessary; see above) should be selected no later than March 1st of the first year in the degree program.

Research Committee — A three-person research committee must be formed for each Masters student, consisting of the primary advisor and two other members. Two of the members of this committee must be graduate faculty in the department (see page 3). The composition of the research committee and signatures from each of the members must be filed with the Departmental Graduate Office by April 1st of the first year of the degree program. Any change must be communicated immediately to the Graduate Office.

Completion of written thesis — The thesis should be prepared in a form that is essentially ready to submit for publication in an appropriate journal(s). Publication of results is strongly encouraged but not required. The format of the thesis must conform to the University’s official policy on the production of theses (Appendix 4).

Timeframe — Master’s Degrees must be completed within five years of enrollment, or six years for Dual Masters degrees. Students who exceed this time frame must revalidate coursework.

M.S. Requirements — Students in the M.S. degree program who apply successfully for admission into the Ph.D program in our Department must complete all formal requirements for the degree no later than one semester after entering the Ph.D program.

Application for Advanced Degree Form — This form is on the Graduate School website: http://www.indiana.edu/~grdschl/forms/index.shtml, and must be completed and submitted a minimum of 60 days prior to desired graduation date, regardless of whether you will attend the commencement ceremony.

Commencement ceremony — If you wish to attend the commencement ceremony, paperwork must be filled out in advance. To attend the December commencement, forms must be filled out around mid-September; for the May commencement, forms must be filled out around mid-February. Further information can be found at the Indiana University Ceremonies website: www.indiana.edu/~ceremony/. Consult with the Departmental Graduate Office GY 127 for further information.

M.S. Thesis Presentation — Students are encouraged to present their final M.S. research results at a regional or national meeting (e.g., AGU, GSA, AAPG, etc.) A departmental defense with title, date, time and location announced to the department is not formally required but is strongly recommended.
MASTER OF SCIENCE
‘REPORT OPTION’ OVERVIEW

This degree option is not recommended for most students because it may limit future educational and professional goals. An exception is students who plan to continue in the Ph.D. program in our Department, building directly on research begun in the M.S. program. In such circumstances the report route can streamline that transition when appropriate but the formal decision to pursue this option should only be taken after admission to the Ph.D. The degree requirements include:

Total of 30 credit hours:

• 27 of the 30 hours must be graduate-level courses; the remaining 3 can be G810. 400-level courses from the Department of Geological Sciences that can be taken for graduate credit are listed in Appendix 6. 500- to 700-level Geology courses, and lower-level courses from other departments that count toward graduate credit can be found in the University Graduate School Academic Bulletin (see the section entitled Graduate Credit-General in the Academic Regulations section of the University Graduate School Academic Bulletin).

• 20 of the 27 hours must be from the Department of Geological Sciences.

• At least three 3-credit hour courses of 500 level or above must be taken from the Department of Geological Sciences.

• Selection of courses to be taken should be discussed with the primary advisor and research committee.

Other graduate classes:
C503 Spectroscopic Methods for Structural Determination | 3.0 |

Research Hours:
G810 Research | 7.0 |
Total | 30.0 |

Transfer of credit — as above in MS overview.

Minimum Grade Point Average — as above in MS overview.

Report — the precise format and content of the report are determined in collaboration with the student’s advisor and research committee. The report must be signed by the entire research committee. It is recommended that the report be in a format suitable for publishing, but it is not required.

Primary Advisor — an advisor (and co-advisor if necessary; as above in MS overview) should be selected no later than March 1st of the first year in the degree.

Research Committee — as above in MS overview.

Timeframe — as above in MS overview.

Application for Advanced Degree Form — as above in MS overview.

Commencement Ceremony — as above in MS overview.

M.S. Report Option Presentation — Students are encouraged to present their final M.S. research results at a regional or national meeting (e.g., AGU, GSA, AAPG, etc.) or as a departmental defense with title, date, time and location announced to the department.
MASTER OF SCIENCE DEGREE:
GEOLOGICAL SCIENCE-ATMOSPHERIC SCIENCES

Admission Requirements
Undergraduate major in geological science, Atmospheric Science, mathematics, physics, chemistry, biology, or equivalent. Applicants not meeting this requirement may be expected to take additional work.

Fields of Study — Atmospheric Sciences

Course Requirements
Requirements are the same as the M.S. degree (thesis or report option) with one additional requirement. At least 12 credit hours must be from a list of courses specific to Atmospheric Sciences defined by the Department of Geological Sciences.

M.S./M.S.E.S.
Master of Science in Geological Sciences/
Master of Science in Environmental Science
This degree program is appropriate for students from a wide range of undergraduate science programs interested in a career in environmental sciences. This dual masters’ program is a 51-credit hour (two year) program that gives the student greater depth and breadth than is possible in a single degree.

Admission Requirements
A student must apply to and be accepted by both the Department of Geological Sciences and SPEA.

Course Requirements
Course requirements are a minimum of 21 credits from each program distributed as follows:

(1) Geological Sciences core (12 cr.)
(2) Environmental Science core (12 cr.)
(3) economics, policy, and law competencies (6 cr.)
(4) tool skill (3 cr.)
(5) other Geological Sciences or SPEA courses recommended by advisory committee and
(6) 9 credits of research split between Geological Sciences and SPEA.

The distribution of credits across these requirements can be modified with the approval of the research committee. A committee with a minimum of three members will supervise the student’s research program. At least one member of the committee must have a primary affiliation with the Department of Geological Sciences and at least one member must have a primary affiliation with SPEA. Two members of the advisory committee must be named as co-advisors with one advisor from each program.
DOCTOR OF PHILOSOPHY DEGREE OVERVIEW

The requirements below presume that the student begins the program having completed an MSc. Degree. The requirements are:

Total of 90 credit hours:

- 35 of the 90 hours must be graduate-level courses.
- 12 of these 35 hours must be graduate courses from the Department of Geological Sciences. In exceptional cases (e.g., when a student enters the Ph.D program with a strong background in the geological sciences and finds few courses in the department that will support their doctoral research program), a candidate may petition the Graduate Studies Committee in writing to waive this requirement.
- Transfer of credit up to 30 credit hours of graduate classes can be transferred from another institution, as long as a grade of ‘B’ or higher was earned. Pass/Fail or ‘S’ graded classes cannot be transferred. Courses to be transferred must be approved by the University Graduate School and completed 90 credit hours. A maximum of 6 semesters of G901 is permitted. G901 is currently 6 credit hours per spring and fall semester. Summer enrollment is not required unless the student intends to receive the degree during summer, in which case the student should enroll in 1 credit of G810 is necessary.

Minimum Grade Point Average — All Ph.D students must maintain a 3.0 (B) grade point average.

G901 Advanced Research — Dissertation credits as G901 can be taken when the student has fulfilled all the course requirements detailed above, and completed 90 credit hours. A maximum of 6 semesters of G901 is permitted. G901 is currently 6 credit hours per spring and fall semester. Summer enrollment is not required unless the student intends to receive the degree during summer, in which case the student should enroll in 1 credit of G810 is necessary.

Primary Advisor — an advisor (and co-advisor if necessary; see page 3) should be selected no later than December 1st of the first year of the degree.

Advisory Committee — The advisory committee shall approve the student’s program of study and counsel the student until the passing of the Qualifying Exam. The advisory committee must include at least two members from the major area and one from the minor. The name of the primary advisor and two other members of the committee must be confirmed in a signed letter to the Graduate Secretary.

Research Committee — Following the qualifying exam, a research committee must be selected, consisting of the primary advisor and 3-4 other members. The research committee can include all of the members of the Advisory Committee, supplemented by other IU faculty or individuals from other institutions connected to the research. Three of the members of this committee must be graduate faculty in the Department. The composition of the research committee and signatures from each of the members must be provided on the annual review form; any change must be communicated to the Graduate Office immediately.

Selection of a Minor — Selection of a Minor is also a requirement of the degree. The minor can be an area within the geosciences distinct from the chosen major (e.g., geophysics, geobiology, tectonics, geochemistry, geomorphology, mineralogy, sedimentology, hydrogeology, etc.), or it may be an area from outside the department (e.g., Sustainable Energy, History and Philosophy of Science, Chemistry, Physics, Biology, SPEA, Mathematics, etc.). Selection of internal minors must be approved by the Graduate Committee and by the Graduate School Dean’s office prior to completing the proposed course work. Minors typically take between 6 and 12 credit hours to complete, but actual requirements and courses to be taken will be determined by the Minor Advisor who must be selected by the student from within the department in which the minor will be taken. The minor advisor typically becomes a member of the student’s research committee (see below).

PRELIMINARY EXAMINATION

Objectives

The primary purpose of the Ph.D preliminary exam is to provide a departmental assessment of each student’s level of preparation to complete the Ph.D degree in the early stage. The aim is to (i) ensure that students are actively developing a viable research project, and (ii) identify aspects of students’ academic background that need strengthening early in their course of study.

Administration and Timetable

The Graduate Studies Committee administers the exam. Students who have already completed an M.S. degree are required to take the exam during their first year in the Ph.D program. Students entering the Ph.D program with an undergraduate degree are expected to take the exam during their second year of graduate study. The exam procedure begins late in November and concludes early in the spring semester.

Step 1: Study Plan — Toward the end of the fall semester students are required to complete a preliminary Ph.D research and study plan comprised of three parts:

Research Statement. A brief (less than one page) summary of a student’s research plan. The format should be comparable to the “Intellectual Merit” section of the project summary for a standard proposal to the National Science Foundation written for a non-specialist in the research area.

Personal Statement. An assessment by the student of their perception of individual strengths and weaknesses pertinent to their research goals. This should address three areas: (i) academic background (e.g. coursework and field experiences), (ii) research skills (e.g. talents in writing, mathematics, computing, laboratory work, etc.), and (iii) personality characteristics important to professional success (e.g. tenacity, flexibility, commitment, ability to work in a team, etc.). Students should view this task as an opportunity
for objective professional self-assessment that can help the committee identify appropriate topics for discussion during the oral exam. An honest assessment will be most beneficial in this regard because it will facilitate recognition of areas of academic background that need strengthening and thereby aid ultimate success.

**Intellectual Development.** A bulleted list of specific targets in academic preparation and research skills that require strengthening in order to complete your Ph.D.

**Step 2: Feedback: Review of Study Plan** — The graduate committee and the student’s advisor will provide written feedback to the student two weeks after the deadline for submission of the study plan. This response will be in the form of a review that the student should use as a guide in preparation for the oral exam. It will focus on topics that will constitute the principal points for discussion in the oral exam, especially areas that students identify as strengths, rather than weaknesses.

**Step 3: Oral Exam** — The Graduate Studies Committee will schedule an oral exam for individual students in January with each student’s advisor participating as an observer. Question topics will focus on areas of knowledge described in the individual review guide given to each student and centered on their strengths. Students should recognize, however, that the broad objective of the exam is to identify areas that need strengthening; hence, the committee may ask questions regarding any aspect of geosciences.

**Step 4: Results of Exam** — There are three possible outcomes of this exam:

- **Unconditional Pass.** This pass recognizes that a student has a background without deficiencies, a viable research plan, and is suitably prepared for success in the Ph.D program.

- **Deferred Decision.** When the student’s self evaluation or the exam reveals a need to augment their academic background there may be a requirement to complete one or more courses, or fulfill other specific conditions, as determined by the committee and advisor. The result of the exam may be deferred pending the student’s fulfillment of the conditions imposed by the committee.

- **Fail.** A student can fail this exam. The primary reason for failure will be a student’s inability to convince the committee that he/she can successfully complete the Ph.D program. For example: (i) an inability to provide coherent answers during the oral exam; (ii) the absence of a viable research plan; (iii) evidence of a lack of commitment to the profession or to the Ph.D. program. There is no possibility for retaking the exam for students who fail.

**Qualifying Examination** — This is a three-stage process and can be undertaken only after minimum course requirements have been fulfilled. It should be taken no later than the 6th semester after passing the Preliminary Exam:

1. The candidate will prepare a research proposal of approximately 15 pages excluding figures and references. This will be reviewed by the student’s advisory committee and used as part of the exam assessment. The proposal must demonstrate that the proposed research consists of a suitable topic in terms of feasibility and importance. Preliminary results and familiarity with the field and literature are necessary before writing the proposal. Once revisions are made and the proposal is accepted by the advisory committee, the second stage can be initiated.

2. A written examination based on the research proposal is prepared by the advisory committee. This is a closed-book examination taken on a day chosen by the student, spanning approximately 3 hours in the morning and 3 hours in the afternoon. The examination is meant to evaluate familiarity with the chosen research area, to assess the relation of this field of research to others in the geosciences, and to alert the student to potential weaknesses in the research proposal. The advisory committee will evaluate responses to the examination. If responses are deemed sufficient, the third part of the process occurs. Students who fail the examination will be asked to leave the graduate program at the end of the semester, retake the examination, or take remedial classes within 6 months of the examination date.

3. Within 2 weeks after the written exam, the oral portion of the exam takes place. The format normally consists of an oral presentation of the research proposal to the advisory committee, and responses to committee members’ questions regarding both the proposal and the examination answers. This examination takes approximately 3 hours. A room within the department must be booked for this purpose and presentation equipment reserved (see the staff person in room 129). Possible outcomes of this exam are: pass (admission to formal Ph.D. Candidate status), fail with permission to retake the exam, fail without permission to retake the exam, or a conditional pass (the candidate may need to satisfy some requirements set by the committee, which may involve further classes or research).

**Nomination to Candidacy.** The Nomination to Candidacy form must be completed online at http://www.indiana.edu/~grdschl/forms/index.shtml prior to the Qualifying Examination. If a candidate passes, all committee members must sign the form on the day of the Qualifying Examination. This form is then sent to the University Graduate School for acceptance of the examinee to become a formal Ph.D candidate. After approval of the Graduate School, the candidate must complete the form for nomination of research committee, which is on the University Graduate School’s website (http://www.indiana.edu/~grdschl/index.shtml).
Completion of Written Dissertation—The dissertation should be prepared in a form that is essentially ready to submit for publication in appropriate journals. Publication of results is strongly encouraged. The format of the dissertation must conform to the University’s official policy on the production of theses (Appendix 4). Recently completed Ph.D dissertations in the Department library are good examples to follow.

Dissertation Defense—The defense should timed to ensure that at least eight months will elapse between passing the Qualifying Examination and the date the degree is awarded. The Research Committee and student must come to an agreement that the dissertation is at a stage that is suitable for defense, based on drafts of the dissertation submitted to the committee. An Announcement of Defense must be submitted to the University Graduate School a minimum of 30 days prior to the defense date. An example of the format required is included in Appendix 4. Two weeks prior to the defense a copy of the dissertation must be placed in the front office of the department for public perusal. The defense itself consists of a public presentation of the dissertation research that any interested faculty and students may attend, followed by an open session of questions and discussion, after which the student’s Research Committee conducts a rigorous closed-session, oral examination of the student.

The result of the defense is determined as a pass, conditional pass, a deferred decision, or a failure without the option to retake. The conditional pass usually requires revisions of the dissertation as recommended by the research committee, and a deferred decision indicates that the opinion of the research committee was not unanimous, a circumstance that requires reports from the research committee detailing the differing opinions to the Dean of the Graduate School.

After a successful defense, the Graduate Office needs to receive (i) one signed copy of the dissertation abstract, and (ii) one signed dissertation. Students should plan submit the final version of their dissertation electronically to the University Graduate School as soon as possible.

Timeframe—The Ph.D dissertation must be accepted by the student’s research committee and a copy must be submitted to the University Graduate School within seven years of passing the Qualifying Examination. Failure to do so will result in termination of Ph.D candidacy. Reinstatement of candidacy is possible and involves obtaining permission of the department chairperson, fulfilling any reinstatement requirements from the Department, passing the Qualifying Examination again, and then requesting reinstatement from the Dean. Once reinstated, the degree must be completed within three years.

Ph.D Commencement Participation Application — Paperwork must be filled out in advance to attend the commencement ceremony. To attend the December commencement, forms must be filled out in mid-September; for the May commencement, forms must be completed in mid-February. Further information can be found at the Indiana University Ceremonies website http://www.indiana.edu/~ceremony/. Further information can be obtained from the Graduate Office in Geology 127.

DOCTOR OF PHILOSOPHY DEGREE
WITHOUT PRIOR M.SC. DEGREE IN GEOLOGICAL SCIENCES

The requirements below presume that the student begins the program having completed a Bachelors degree. The requirements include:

**Total of 90 credit hours:**
- 35 of the 90 hours must be graduate-level courses.
- 25 of these 35 hours must be graduate courses from the Department of Geological Sciences
- Transfer of credit - as specified for Ph.D.

The following items have the same requirements as those specified in the Ph.D. Overview:
- A 3.0 (B) grade point average
- G901 Advanced Research
- Primary Advisor
- Research Committee
- Selection of a Minor
- Preliminary Examination - students are expected to take the examination either in their first or third semester of enrollment in the degree program.
- Qualifying Examination
- Completion of Written Dissertation
- Dissertation Defense
- Timeframe

1. Only the listed phone number is needed when calling from on-campus; add 85 to the front to reach them from off-campus locations.
2. Add @indiana.edu to each of these emails to contact the person.

Please note that this list changes every year – please consult the updated directory information placed in student mailboxes at the beginning of the fall semester.
APPENDIX 2

ANNUAL REPORT FORM FOR THE MASTERS DEGREE
INSTRUCTIONS: Download this form from
http://geology.indiana.edu/education/grad_handbook.html
It should be completed and sent to Toni Arcuri no later than April 15th.

NAME: ______________________________________________________________________

ANNUAL REVIEW OF M.S. DEGREE PROGRESS

Students are required to organize a brief meeting with their Advisory Committee at least once a
year (before April 15) to ensure that they share a common understanding of course selections, and research
activities, plans and goals.

To assist in this process, students should provide copies of the form, duly completed, to all committee
members at least 24 hours prior to this progress meeting. After the meeting, a PDF of the completed and
signed form should be submitted to Ms. Toni Arcuri in the Graduate Services Office (room 127). Information
on this form and in the summary statement of research progress will be used by the Committee on Graduate
Studies to help rank students for academic awards and financial support.

COURSEWORK CHECKLIST

Graduate requirements: Complete? Comments

1. ≥ 9 credit hours ≥ 500 level
2. ≥ 12 of the 22 hours of graduate course credits in Geological Sciences
3. ≤ 8 credit hours graduate transfer credit
4. ≥ 30 credit hours total graduate credit

Annual course load is 30 credit hours: 12 in Fall & Spring Semesters, 6 in Summer Session

RESEARCH PLANS

Program Options:

M.S. students must complete:

☐ Either a thesis (strongly recommended),
☐ Or a research report plus the research skill

Provisional Thesis (or Report) Title:

Brief Outline (max, 1 page) of Research Objective & Strategies:

Aims, field work, sampling, analytical methods, etc.

Summary of Immediate (3-6 months) Research Plans:

Future activities, especially during the summer months
PROPOSED LONG-TERM RESEARCH PLANS AND TIMETABLE:
Anticipated phases of research activities and contingencies

Timetable and Dates:
1. Annual Review: Date, time, and venue
2. Thesis Completion: Target dates for draft and final version. Provisional date for thesis defense.

Summary of Financial Support:
Indicate sources of support, e.g. Al (provide course #), RA (note funding agency & PI), Fellowship (give source, self, other grants (e.g. GSA, Sigma Xi, etc.)

RESEARCH PROGRESS

Summary of Progress
A summary statement, preferably a one-page synopsis, which documents the following items, should be appended to this form. Several of these details would typically be compiled for inclusion in a full curriculum vitae, which may also be appended to this report.

1. Research Activities: Summarize achievement during the past year in field work, in laboratory analyses, in data collection, and written reports.
2. Proposals and Contributions to Proposals: Document grant applications submitted for research or fellowship support, including title, funding agency, date of submission, duration, purpose, and amount of funding sought/awarded, and the current status (whether pending, accepted, or declined). A copy of the proposal should be provided. Comparable information should also be given for grant applications submitted by others, for example an advisor or collaborator, to which you contributed. In such cases a copy of the proposal summary should be provided.
3. Conferences and Short Courses: Give details of meetings, short course or workshops attended, including their title(s), sponsoring organizations (e.g. GSA, AAPG), dates, location, and the source of any financial support enabling attendance.
4. Presentations: Provide a summary of any contributions to oral presentations or posters with information on the title, authorship, venue, date, and speaker (if applicable). Include a copy of the abstract, if available.
5. Publications: List all abstracts and papers, giving title, authorship, journal or book (e.g. conference proceedings or symposia), volume, pagination, and date of publication. Separately list comparable information for other manuscripts in preparation, submitted, under revision, accepted, or in press. Denote whether publications are peer-reviewed and provide copies of abstracts.
6. Other Academic or Career Activities: Comment on any other relevant activities (e.g. internships) and on any awards received.
COMMITTEE REVIEW AND REMARKS

Coursework Status

Based on details documented in Coursework Summary.

1. Required Course. As determined by Advisory Committee:

2. General Requirements. Enter accumulated credit hours within each category.
   - ≥ 500 level Geol. Sci. (≥ 9h)  □
   - Total Geol Sci. (≥ 20 h)  □
   - Transferred grad. Credit (≤8 h)  □
   - Total graduate credit (≥ 30 h)  □

3. Options. Specify credit hours accumulated within chosen option.
   - Option A: Research (≤8 h)  □
   - Option B: Research (≥ 3 h)  □ plus Research skill (≥6 h)  □
   - Option C: Research (≥ 3 h)  □

COMMITTEE COMMENTS

1. Assessment of Degree Progress. Contents based on coursework & research activities:

2. Recommendations. Specific suggestions or requirements regarding degree progress.

Approval. Signatures designate agreement on course selection and research programs.

Announcing the Final Examination of

For the
Degree of Doctor of Philosophy in Geological Sciences
Thursday, December 7th, 2012, 1:00 p.m.
Room GY338, Geology Building

Dissertation: Open System Magmatism, and the emplacement of the Partridge River Intrusion, Duluth Complex, Minnesota.

The Partridge River Intrusion (PRI) is one of several large, tholeiitic bodies that occur along the Western portion of the Duluth Complex in northern Minnesota. Mafic magmatism developed in response to intercontinental rifting at approximately 1.1 Ga. The intrusion is host to several Cu-Ni sulfide deposits that are found near the basal contact with metapelitic footwall (the Proterozoic Virginia Formation). The upper portion of the PRI is characterized by thick, unlayered, monotonous sequences of troctolite and augite troctolite. Thin (usually less than 5 meters in thickness) layers of melatroctolite and picrite occur at irregular intervals. Cu-Ni mineralization, and iron-rich units of ferrogabbro occur near the base of intrusion. The ferrogabbro units are also enriched in incompatible elements (P, Y, Ti), and are intercalated with troctolite.

Previous researchers have suggested genetic mechanisms to explain the chemical variations in the PRI that range from differentiation of a single magmatic pulse, to multiple inputs of chemically distinct magma. This study was conducted to evaluate and model the magmatic process involved during the emplacement of the PRI. Samples were selected from a drillcore located to the northwest of the major Cu-Ni sulfide body at the Babbitt deposit. The site was chosen to avoid discontinuities caused by the presence of metapelitic xenoliths of the Virginia Formation, which are common in the vicinity of the mineralization.

Ferrogabbro at the bottom of the intrusion was derived from an evolved melt of ferrodioritic composition, emplaced early in the history of the PRI. A later, more primitive troctolitic melt intruded the ferrogabbro. The main massive Cu-Ni mineralization is distinct, isotopically and compositionally, from the overlying disseminated mineralization, and was emplaced as a separate body, also early in the history of the PRI. Both the differentiated, ferrogabbroic melt and the sulfide melt which formed the massive mineralization evolved in one or more staging chambers in the shallow crust.

Outline of Studies
Major: Geology
Minor: Geochemistry

Educational Career

# APPENDIX 5: OUTSIDE COURSES

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>A304</td>
<td>Introductory C++ Programming</td>
<td>2.0</td>
</tr>
<tr>
<td>A306</td>
<td>Object oriented programming in C++</td>
<td>2.0</td>
</tr>
<tr>
<td>A346</td>
<td>User Interface Programming</td>
<td>3.0</td>
</tr>
<tr>
<td>C201</td>
<td>Introduction to Computer Science</td>
<td>4.0</td>
</tr>
<tr>
<td>C202</td>
<td>Introduction to Software Systems</td>
<td>4.0</td>
</tr>
<tr>
<td>C311</td>
<td>Programming Languages</td>
<td>4.0</td>
</tr>
<tr>
<td>C335</td>
<td>Computer Structures</td>
<td>4.0</td>
</tr>
<tr>
<td>C343</td>
<td>Data Structures</td>
<td>4.0</td>
</tr>
<tr>
<td>M371</td>
<td>Elementary Computational Methods</td>
<td>3.0</td>
</tr>
<tr>
<td>M471</td>
<td>Numerical Analysis I</td>
<td>3.0</td>
</tr>
<tr>
<td>M472</td>
<td>Numerical Analysis II</td>
<td>3.0</td>
</tr>
<tr>
<td>P302</td>
<td>Elementary Electronics</td>
<td>2.0</td>
</tr>
<tr>
<td>P421</td>
<td>Digital Electronics and Microprocessors</td>
<td>3.0</td>
</tr>
<tr>
<td>P422</td>
<td>Analog Electronics and Semiconductor devices</td>
<td>3.0</td>
</tr>
<tr>
<td>P431</td>
<td>Electronic Laboratory I</td>
<td>2.0</td>
</tr>
<tr>
<td>P432</td>
<td>Electronic Laboratory II</td>
<td>2.0</td>
</tr>
<tr>
<td>C315</td>
<td>Chemical Measurements Laboratory I</td>
<td>3.0</td>
</tr>
<tr>
<td>C317</td>
<td>Equilibria and Electrochemistry</td>
<td>2.0</td>
</tr>
<tr>
<td>C318</td>
<td>Spectrochemistry and Separations</td>
<td>2.0</td>
</tr>
<tr>
<td>C364</td>
<td>Introduction to Basic Measurements</td>
<td>3.0</td>
</tr>
<tr>
<td>C501</td>
<td>Chemical Instrumentation</td>
<td>3.0</td>
</tr>
<tr>
<td>E515</td>
<td>Vector-based Geographical Information Systems</td>
<td>3.0</td>
</tr>
<tr>
<td>E526</td>
<td>Applied Math for Environmental Science</td>
<td>3.0</td>
</tr>
<tr>
<td>E536</td>
<td>Environmental Chemistry</td>
<td>3.0</td>
</tr>

</table>
G-404, Geobiology
G-406, Introduction to Geochemistry
G-411, Invertebrate Paleontology
G-413, Introduction to Earth Physics
G-415, Geomorphology
G-416, Economic Geology
G-417, Optical Mineralogy
G-418, Igneous and Metamorphic Petrology
G-420, Regional Geology Field Trip
G-423, Methods in Applied Geophysics
G-427, Introduction to X-Ray Mineralogy
G-429, Field Geology in the Rocky Mountains
G-451, Hydrogeology
North Pole 3 hrs. 15 min.
Copenhagen 4 hrs. 15 min.
Los Angeles 6 hrs. 45 min.
Moscow 5 hrs. 20 min.
New York 4 hrs.
Rome 5 hrs.
Tokyo 10 hrs. 05 min.
Paris 4 hrs. 25 min.
Frankfurt 4 hrs. 40 min.
London 3 hrs. 35 min.
