

David A. Lilien

Assistant Professor

Department of Earth and Atmospheric Sciences, Indiana University

dlilien@iu.edu

Academic Appointments

Assistant professor Department of Earth and Atmospheric Science, Indiana University	2024 –
Research associate Centre for Earth Observation Science, University of Manitoba	2021 – 2023
Postdoctoral researcher Physics of Ice, Climate, and Earth, Niels Bohr Institute, University of Copenhagen	2019 – 2021

Education

PhD in Earth and Space Sciences University of Washington, Seattle, WA	2019
BS in Physics and Mathematics Yale University, New Haven, CT	2013

Research Interests

I study the dynamics of ice streams in Antarctica and Greenland. I am most interested in new ways to use radar to improve numerical models of ice streams and outlet glaciers, particularly through better understanding of ice-crystal fabric and rheology.

Fellowships

NASA Earth and Space Sciences Fellow 3 years stipend, portion of tuition	2015 – 2018
University of Washington Program on Climate Change Fellow 9 months stipend	2013

Publications

- Rathmann, NM, **DA Lilien**, D Richards, and M Montagnat. Equivalent isotropic enhancement factor of ice shelves. In prep.
- Henry, ACJ, F Oraschewski, NM Rathmann, **DA Lilien**, MR Ershadi, O Eisen, C Martín, and R Drews. Anisotropy of Ekström Ice Shelf. In prep.

Conference Papers

- Knerr, N, D Taylor, S Gogineni, **D Lilien**, D Steinhage, D Dahl-Jensen, H Miller, and O Eisen (2022). Processing and Analysis of Radar Data to Map Layers Near the Bed to Determine Optimum Ice Core Site. *IGARSS 2022 IEEE International Geoscience and Remote Sensing Symposium*, 4182–4184. (doi:10.1109/IGARSS46834.2022.9884035)
- SF Liew, **D Lilien**, H Noh, H Cao, BR Wasik, AJ Dinwiddie, and A Monteiro (2014). Artificial selection for structural color on butterfly wings and comparison to natural evolution. *Conference on Lasers and Electro-Optics (CLEO) - Laser Science to Photonic Applications*. 1-2.

Field Experience

- | | |
|--|------|
| Müller Ice Cap, Nunavut, Canada | 2023 |
| Led planning and logistics for two week, five person team based on an ice cap in the Canadian Arctic, supported by the Polar Continental Shelf Program. Led radar survey in support of ice-core selection. | |
| EastGRIP, Greenland | 2022 |
| Worked on extensive radar survey using two new, state-of-the-art radars. Led radar operation and data processing, co-led survey design. Work included supervision of two PhD students while in the field. | |

Little Dome C, Antarctica	2019
Part of a 3-person radar team surveying to select the location of the Beyond EPICA Oldest Ice core. Led data processing, assisted in data collection and survey design.	
South Pole, Antarctica	2016 – 2019
Three seasons on an NSF-sponsored project at South Pole Station and in the deep field. Led extensive high frequency radar survey. Co-led shallow-core and GPS survey. Assisted in drilling operations and firn-densification instrument installation.	
Mt. Baker and Mt. Rainier, WA	2015 – 2018
Assisted with various 1-2 day surveys using Lidar, ground-based interferometric radar, and GPS on Easton, Coleman, and Nisqually glaciers.	

Service

Journal reviewer

Annals of Glaciology, The Cryosphere, Geophysical Research Letters, Journal of Geophysical Research: Earth Surface, Journal of Glaciology, Nature Geoscience, Transactions on Geoscience and Remote Sensing.

Proposal reviewer

Panel: NSF glaciology

Ad hoc: *DFG* (German research foundation), *AWI* (for time on German polar aircraft)

Participant, NASA DEBRIS mission design workshop	2022
Graduate student representative on first-year PhD exam committees	2017 – 2018
Graduate student representative on student awards committee	2018

Teaching Experience

Courses taught

EAS-A476: Climate change science	Spring 2024, Fall 2024
EAS-E314: Data analysis for earth science	Fall 2024

Mentor for graduate students

Kelsey Voss, UoM – MSc student, advised on glacier modeling	2021 – 2023
Niels Nymand, UCPH – PhD student, advising on radio echo sounding	2022 – present
Debanshu Banarjee, UoM – MSc student, advising on glacier modeling	2022 – 2024

Mentor for undergraduates

Ian Lee – remote sensing of Nivlisen Ice Shelf	2015
Joshua Driscoll – automatic layer picking for radar	2018 – 2019

Teaching assistant

UW ESS 451: *Principles of glaciology* 2015

Guest Lectures

Ice-crystal fabric and glacier dynamics: modeling a property that controls and records ice flow. For U. Manitoba GEOG 3390 Introduction to Climate Change. 2023

Ice flow modeling. For U. Manitoba ENVR 3000 T05: Introduction to Numerical Modelling. 2023

Open-source software in the geosciences: lessons from ImpDAR. for University of Washington summer interns in glaciology 2022

ImpDAR: an open-source radar processor for University of Maine graduate students 2022

Substitute lecturer for University of Washington ESS 431, 1 class 2018

Presentations

“Ice-crystal fabric: modeling and observing a micro-scale property that is key for continental ice flow.” *Indiana University Indianapolis Earth Sciences*. September, 2024. Invited.

“Ice-crystal fabric: modeling and observing a property that controls ice-sheet flow.” *Georgia Tech Glaciology Group*. February, 2024. Virtual. Invited.

“Ice-crystal fabric: modeling and observing a property that controls ice-sheet flow.” *Indiana University Earth and Atmospheric Sciences*. March, 2023. Invited.

“Using ice-flow models and radar to understand ice-stream retreat.” *Washington State University School of the Environment*. February, 2023. Virtual. Invited.

“Simulating complex fabrics in a coupled, anisotropic ice-flow model: application to Dome C.” Poster. *AGU Fall Meeting*. December, 2022.

“Ice-crystal fabric: inference from radar and why it matters.” *DEBRIS Workshop, NASA JPL*. September, 2022. Invited.

“Modeling ice-crystal fabric as a proxy for ice-stream stability.” Poster. *AGU Fall meeting*. December, 2020.

“Modeling ice-crystal fabric as a proxy for ice-stream stability.” *University of Tubingen/Alfred Wegner Institute structural geology seminar*. November, 2020. Invited.

“Melt at grounding line controls observed and future retreat of Smith, Pope, and Kohler Glaciers.” *EGU General Assembly*. May 2020. Highlight talk.

“Using ice-flow models to understand and contextualize modern ice-stream retreat.” *University of Wisconsin Weeks lecture*. February 2020. Invited.

“Modeled temperature and basal shear stress of NEGIS and implications for surge mechanics of Storstrømmen.” *EastGRIP Steering Meeting*. November 2018.

“Elevated melt causes varied response of Crosson and Dotson Ice Shelves.” *West Antarctic Ice Sheet Workshop*. October 2017.

“Modeling the influence of melt and buttressing on the recent speedup of Smith Glacier.” *International Symposium on the Interaction of Glaciers and Ice Sheets with the Ocean*. July 2016.

“Quantifying Uncertainty in Inferred Viscosity and Basal Shear Stress Over Ice Streams.” Poster. *AGU Fall Meeting*. December 2015.

“Modeling ocean-forced changes in Smith Glacier, West Antarctica.” Poster. *AGU Fall Meeting*. December 2014.

Outreach

Volunteer, Science Fest, Indiana University	2024
Organizer, glaciology display, Polar Science Weekend, Pacific Science Center	2015–2018
Volunteer, University of Washington Rockin’ Out	2013–2019

Computer Skills

Proficient: Python, Git, Bash, Elmer/Ice, Fortran, QGIS

Familiar: Matlab, C, Slurm, Torque

Professional Affiliations

International Glaciological Society

American Geophysical Union

European Geosciences Union
